Mastering Financial Modelling, Analysis & Valuation

About Financial Modelling, Analysis & Valuation

Financial modeling, analysis, and valuation involve creating mathematical representations of a company's financial performance to evaluate its stock value. These techniques include analyzing historical data, projecting future performance, and determining intrinsic value using methods like DCF, comparable analysis, or market multiples. They aid investors in making informed stock market decisions.

Course content:

Understanding Financial Modelling and Statements

Grasp the fundamentals of financial modelling and the interpretation of financial statements.

Building Advanced Financial Models

Create scalable and practical financial models for business applications.

Analyzing Financial Statements

Evaluate statements to uncover performance insights and assess financial health.

Valuation Techniques

Learn advanced methods to determine the true value of businesses and assets.

Case Studies in Financial Modelling

Apply skills to real-world scenarios through detailed case studies.

Risk and Scenario Analysis

Incorporate risk and sensitivity analysis to refine forecasts and decisions.

The Faculty:

Highly Qualified faculty (Including CA, CFA, FRM, MBA, and Ph.D. holders) having experience working in the Corporate World. So that they can give a better understanding of financial concepts with real-world implications. Along with giving real-life examples the faculty will also support you in solving the real-life scenario and help the learners innovate in business practice.

The Empirical F & M Academy faculty team includes outstanding educators and researchers from both the academic and business sectors, contributing towards the overall professional and personal growth of the students.
