

Trade Smart Using Technical Analysis

About Technical Analysis

The Technical Analysis course is designed to Enhance your mindset and turn you into a professional trader from a beginner. "Technical Analysis" is effectively an indirect study of Investor behavior and its effect on the subsequent price action based on an examination of past price movements. Technical analysis is applicable to stocks, Indices, Commodities, Futures, or any tradable instrument where the price is influenced by the forces of supply and demand.

Course content:

1

Foundations of Technical Analysis

Delve into the art and science of deciphering market trends, price dynamics, and trading behaviors.

2

The Essence of Dow Theory and Pivotal Price Levels

Booklets are printed materials with four or more pages, containing details about a business, event, product, promotion, etc.

3

Trendline Dynamics and the Language of Candlesticks

Explore the intricate world of trendline systems and the eloquent storytelling of candlestick patterns to gain market insights.

4

Mastering Chart Formations and Moving Average Techniques

Decode the complexity of chart patterns and harness the power of moving averages to navigate market waves with precision.

5
